Hoenderop helmsman chairs

Comfort, **quality** and design in every chair

In addition to a wide range of marine supplies, Hoenderop has long been known for its extensive selection of helmsman chairs. Our assortment includes various renowned brands, and we also offer a line of chairs to suit every budget. Whatever the task at hand, we have a suitable chair available from stock.

Because seating comfort is essential and highly personal, Hoenderop features a spacious showroom with many chairs on display. By appointment, you can view a large part of the collection and receive expert advice on the various options.

That way, you're always sitting comfortably!

Norsap

Market leader in innovative helmsman chairs

As the exclusive dealer for the Benelux and Germany, Hoenderop has proudly supported Norsap products for over three decades. The Norwegian company is known for delivering top quality. Each chair is available in a standard

version and can also be fully customized to meet individual preferences. Norsap is renowned for the continuous development of its designs and for manufacturing with the lowest possible ecological footprint.

Special Features & Ergonomics

Work in comfort and health! Norsap chairs are equipped with ergonomic innovations. For example, control panels can be integrated into the armrests to ensure an optimal working posture, helping to prevent physical discomfort.

Shock-absorbing

The dynamic suspension technology reduces shocks and vibrations, minimizing fatigue and the risk of injury.

Seat length

Adjust the seat position in relation to the armrests to accommodate different forearm lengths.

Seat height

Adjust the seat height in relation to the armrests to accommodate different upper arm lengths.

Sitting or standing

Changing your posture is beneficial. This chair moves with you. Perform your work sitting or standing.

The quality of Norsap

Feedback and Certifications

Norsap's mission: to make the best chairs in the world. Listening to the customer and operating according to ISO 9001 and ISO 14001 certifications are central to this mission.

Accommodation Chairs

Recaro

Quality and convenience go hand in hand

Recaro specializes in maritime helmsman chairs. The brand stands for quality. For example, leather is used for the upholstery, stainless steel (RVS) for the frame, the guide rails must operate smoothly,

and the chairs should be easy to adjust. Recaro controls the entire production process in-house, allowing customers to choose between a standard model or a custom-made chair.

Offshore reference

A good posture is essential for the crane operators on Van Oord's offshore installation vessel Boreas. Hoenderop was pleased to supply two Norsap 4000 chairs to Huisman Equipment. The backrests can recline far enough to move with the operator, ensuring optimal visibility of the load being lifted. Additionally, all wiring for the control panels is neatly integrated inside an extra-large column.

Bron: Van Oord

Offshore installation vessel

The Boreas is the largest offshore installation vessel of its kind. The ship measures 175 meters in length and is equipped with a crane capable of lifting more than 3,000 tons. With a boom length of 155 meters, the Boreas is specially designed for the transport and installation of the latest generation of wind turbines and foundations.

Yacht building reference

The superyacht from the Xtreme Yachts line can be fully operated from the helmsman chair, with the control panel integrated into the armrest. The design of the two Norsap 1600 chairs has been customized to match the look and feel of the superyacht. For example, the brown leather upholstery gives the chairs a modern appearance.

Superyacht

The Xtreme superyachts are built by the Dutch shipbuilder Steeler Yachts. The aluminum vessels are not renowned for their length, but rather for their innovative design featuring complex shapes and numerous hull openings. This allows a lot of natural light to flow into the yachts.

Hansen

Every function has its own chair

From the helmsman to the captain and pilot. It doesn't matter who the chair is intended for on board — all types of chairs can be found in Hansen's

assortment. The robust chairs from this Danish manufacturer are known for their quality and seating comfort.

Inland shipping reference

The original design of the Norsap 1500 dates back to the 1990s, yet this helmsman chair remains a bestseller within the assortment. For generations, Norsap helmsman chairs have been used on inland shipping vessels. Besides the comfort, features like the folding backrest and control panels integrated into the armrest are a real advantage for inland shipping.

Inland vessel

The European waterway network comprises approximately 51,700 kilometers of canals, rivers, and lakes. This makes all major industrial areas in Western Europe accessible by inland vessel. Hoenderop supplies many inland vessels with proven-quality Norsap helmsman chairs. And if a part needs replacing? That's taken care of quickly as well!

Navy reference

For the Dutch Navy's supply ship, shipbuilder Damen chose to equip the bridge and control rooms with Norsap 800 chairs. The 41 chairs supplied by Hoenderop had to meet various (ergonomic) requirements to ensure optimal seating comfort.

Bron: Damen

Bron: Ministerie van Defensie

Supply ship CSS Den Helder

The naval ship Den Helder is also known as a Combat Support Ship (CSS). It supplies other vessels in the fleet with fuel, spare parts, and ammunition. The ship was christened in February 2025 by Crown Princess of the Netherlands Amalia.

Seagoing reference

Norsap 1500 is also a frequent choice on board coasters—a chair originally designed for maritime use. Its sturdy column is built to withstand the ship's movements at sea. During a project with Holland Shipyards, five seagoing vessels were built in series for the shipping company Hudig & Veder, all equipped with the Norsap 1500 and matching rails.

Coaster Maasvliet

The coaster Maasvliet is specifically designed for repairing and clearing cables on the seabed. The ship is 90.6 meters long, 13.2 meters wide, and equipped with advanced cable management systems. The hold features special tanks for storing the cables.

Ferry reference

The latest generation of ferries are also equipped with Norsap 1000 chairs. All chairs feature controls fully integrated into the armrests. For this project, Hoenderop collaborated with Alphontrou, which was responsible for the navigation equipment.

Bron: Damen

Waterbus

The new Waterbuses are built by Damen Shipyards. The 28.6-meter-long and 7.5-meter-wide hybrid catamarans are constructed using carbon fiber. As a result, these vessels are thirty percent lighter compared to the aluminum variant. This means less resistance and, combined with the hybrid propulsion system, significantly reduced emissions.

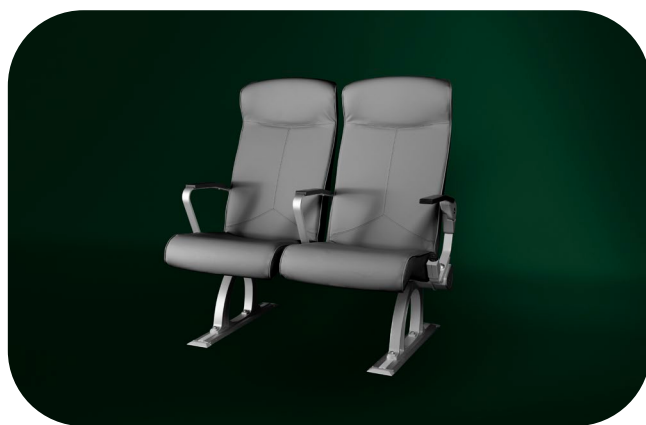

Passenger seats

Craftmanship since 1952

EKNES is a leading manufacturer and designer of high-quality seating solutions for ships and fast ferries. The family-owned company Georg Eknæs Industrier AS was founded in 1952 and is still located just a stone's throw from Bergen, Norway. EKNES has a long tradition of craftsmanship and

reliability, with a strong focus on high quality and timely delivery.

About Hoenderop

We have been connecting **supply and demand** for 50 years

A recognized name in maritime shipping

In 2025, Hoenderop will celebrate its fiftieth anniversary. Over this half-century, Hoenderop has grown from a supplier for inland shipping and fisheries into a market leader in quality products for commercial shipping, serving the entire maritime industry in Northwest Europe.

Traditional values go hand in hand with innovation. The company is actively developing in the areas of digitalization and sustainability. With every step, customer convenience remains the top priority.

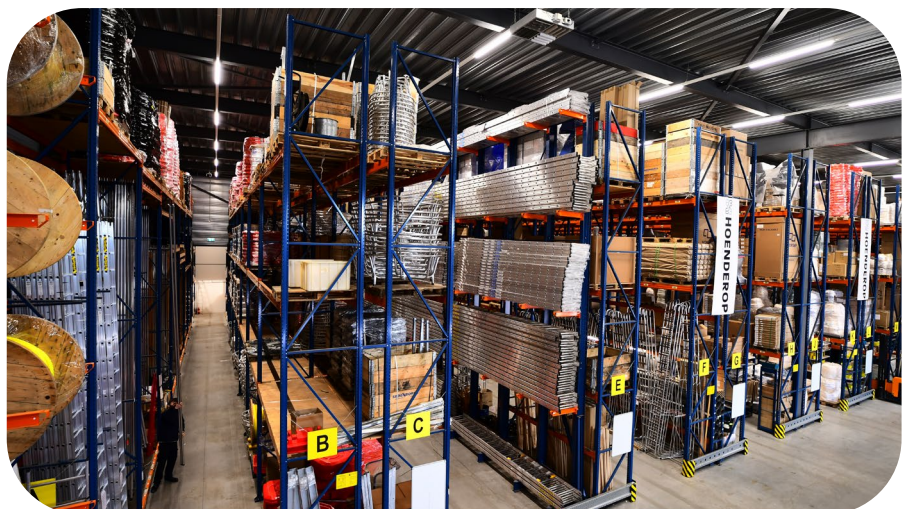

A strong relationship with both dealers and suppliers is a top priority at Hoenderop. This family-owned company from Rotterdam supplies everything needed to keep a ship operational and well-maintained. The assortment includes around 12,000 items, ranging from ropes to helmsman chairs and from maintenance products to lifesaving and safety equipment. Approximately 95 percent of the items are available from stock.

For inland shipping, Hoenderop does not supply end users directly; deliveries go through bunker stations, stores, installers, and shipyards. These companies, in turn, have a reliable partner in Hoenderop, which offers a broad range of products along with fast delivery and excellent service. This makes Hoenderop an extension of the dealers, who themselves do not need to hold large inventories.

For maritime shipping and offshore, we support shipping companies by assisting with part of their procurement and warehousing. This makes Hoenderop a trusted source for all necessary materials for their fleets. From gangways to cutting boards for the galley, materials are packed according to specifications and shipped worldwide.

The innovation of products

This extension role also applies to the manufacturers and suppliers Hoenderop collaborates with. Hoenderop serves as their gateway to the maritime sector. Customer requests are always shared with suppliers to be incorporated into ongoing product innovation.
